KEEP UP WITH YOUR HEART RATE

Monitor your heart rate to optimise your workout

As society becomes more health-conscious, more people are turning to exercise to stay fit. Exercising at the right intensity is vital to staying healthy and achieving your individual fitness goals. For optimal training, and to avoid injury from pushing yourself too hard, all you need is a heart rate monitor.

Exercise is directly related to your heart rate

Heart rate is a useful indicator of the intensity of an exercise. In order to achieve your fitness goals, whether you want to stay healthy, burn fat, lose weight or build muscle, you need to exercise at the appropriate heart rate level.

How to calculate your desired heart rate level

① Find out your resting heart rate.
Simply take your pulse or use your Oregon Scientific heart rate monitor in the morning after you wake up and before you get out of bed.

② Calculate the maximum predicted heart rate. Ideally,
220 – your age = the maximum predicted heart rate.

Your target heart rate zone will be the figure between

① Minimum heart rate
The minimum predicted heart rate x 65%

② Maximum heart rate
The maximum predicted heart rate x 80%

Why choose an Oregon Scientific heart rate monitor?

Oregon Scientific provides smart sports performance monitors. With a range of features such as user-friendly interfaces, smartphone connectivity, tap-on lenses, touch screen, speed/distance tracking, and fat/calorie-burning calculations, these stylish modern accessories are the perfect aids on your path to a healthier lifestyle.

Exercise profile

There are three exercise profiles: walking, jogging and running. Key in your settings to monitor your workout. This will help you progress towards your goals.

Water-resistant

Oregon Scientific heart rate monitors can withstand different levels of water exposure. The following is an international interpretation of the various levels of water-resistance.

Water Resistant Level	Rain Splashes etc	Showering (Warm/ Cool Water Only)	Light Swimming/ Shallow Water	Shallow Diving/ Surfing/ Water Sports	Snorkling/ Deep Water Diving
30M (3atm)	✓	✗	✗	✗	✗
50M (5atm)	✓	✓	✓	✗	✗
100M (10atm)	✓	✓	✓	✓	✗
200M (20atm)	✓	✓	✓	✓	✓

Tap-on lens

Toggling between menus is very easy: simply tap the screen.

Smart training program[1]

Three interval timers – the warm-up timer, exercise timer and recovery timer – maximise your workout while monitoring your fitness.

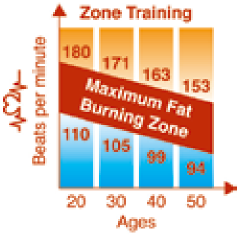
[1] Varies according to model purchased

Heart rate zone alert

An alert will tell you if your heart rate is above or below your pre-set optimal heart rate zone. It tracks your heart rate so you can concentrate on your workout.

Coded[2] (Digital) / Not coded (Analog)

[2] Indicates type of transmission between heart rate monitor and chest belt.



Smartphone Connectivity[3]

Connect with your smartphone to access your exercise profiles and fitness apps, or share your details with others instantly.

[3] Applies to selected models only

SCIENTIFIC

Time & Weather

Make every minute count

Stay on top of your day with confidence and style. Our sleek modern clocks are a beautiful addition to any home. Plan ahead for work or leisure with our modern professional weather stations, which monitor conditions indoors and out.

BE SMARTER

WEATHER TOOLS TO HELP YOU PLAN IN ADVANCE

Know what to expect, whether at home, at work or on the go

It's easy these days to check your local weather, but rapidly changing conditions in smaller areas may go unreported. With a weather station at home and the office, you can be sure you always have accurate and up-to-date information on which to base travel plans, wardrobe decisions, family outings and more.

Oregon Scientific weather stations make life easier!

With a wide range of weather stations from basic thermometers to sophisticated professional models, there's a station for everyone. The information you need is presented in easy-to-read displays and graphics, so they're always user-friendly.

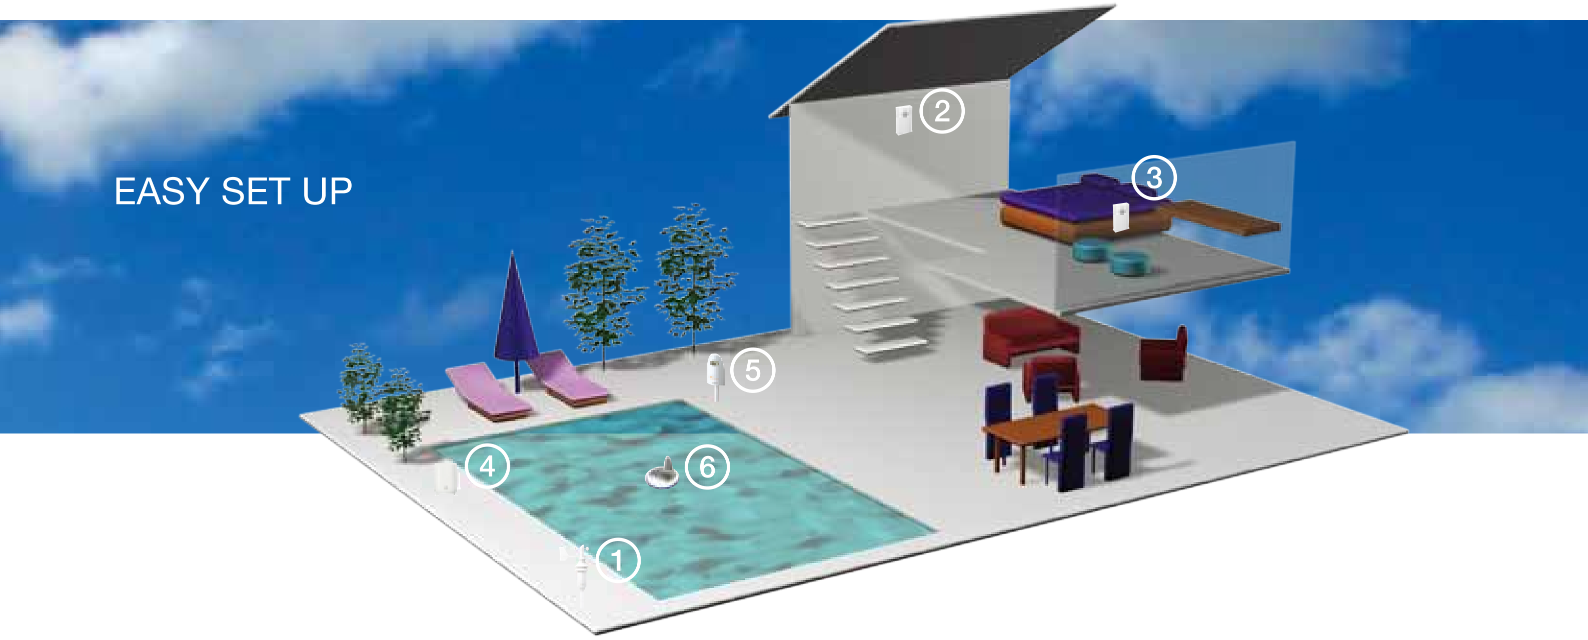
Set-up is simple!

① Place your weather station wherever it's convenient - in your bedroom, living room, in your office, for instance.

② Place sensors in areas where you want to keep track of weather conditions.

That's it!

EASY SET UP



You should place your sensors and weather equipment where they will best address your specific concerns. The following are some examples of how proper placement addresses user needs.

①

Is the wind direction good for sailing? Does my garden need protection from strong winds?

Answer: Place a wind meter (anemometer) on your rooftop or in your garden.

②

Is my family as comfortable as possible? Is my wine being stored at the correct temperature?

Answer: Place a temperature and humidity (thermo-hygro) sensor(s) inside your house in the area(s) you'd like to monitor.

③

Is it too humid for an outing? Is it cold? Should I take a jacket?

Answer: Place a temperature and humidity (thermo-hygro) sensor outside your house.

④

How much rain fell last night?

Answer: Place a rain gauge in your garden.

⑤

What level of sun block do I need?

Answer: Place a UV sensor outside the house in sunlight.

⑥

Will the water be good for swimming?

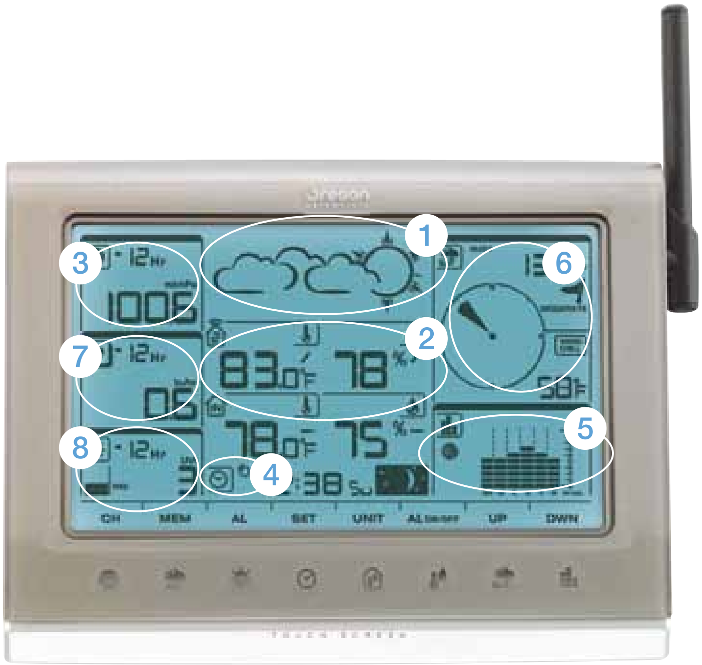
Answer: Place a pool thermometer inside the pool.

HOW YOU CAN KNOW THE WEATHER IN ADVANCE

Everyone benefits from an Oregon Scientific Weather Station

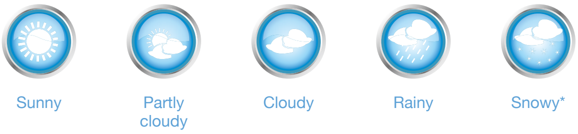
Whether you're a weather enthusiast or you just want to know what tomorrow's forecast and temperature will be, our weather stations provide the information you need to help you be prepared for your day.

1. Weather Forecast
2. Indoor/Outdoor Temperature
3. Barometric Pressure
4. Radio Controlled Functions
5. Record of Accumulated Rainfall, Barometer and UV
6. Wind Speed / Direction / Wind Chill
7. Rainfall
8. UV Index



① You’re always ready, rain or shine

The weather for the next 12-24 hours forecasted in easy-to-see and understandable icons:

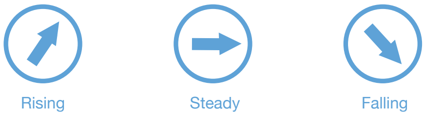


* for some models only

② Is the temperature comfortable for my family?

The temperature displays in either Celsius or Fahrenheit to tell you whether it is too hot or cold. A useful arrow icon tells you how the temperature will change.

Temperature trend indicator



Ensure maximum comfort for you and your family with a glance, simply by reading the temperature conditions in your home and adjusting your thermostat.

③ Barometric pressure in simple figures

The unit for barometric pressure is hPa, with the key pressure level at 1013 hPa. If the number displayed is lower than this, it is likely to rain. If the number is higher, it is likely to stay clear. It’s that simple.

A bar graph also allows you to see the barometric pressure trend for the previous 24 hours. With this information, you can easily tell what weather is heading your way.

Do I need to water my plants? Will it be too wet to go hiking?

You now have all the answers with rainfall information. There are four measurements for rainfall: millimeters (mm), millimeters per hour (mm/hr), inches (in) and inches per hour (in/hr). You can view the rainfall for the current hour, accumulated rainfall or the history for the past 24 hours.

Will I get burnt?

Too much sunlight can be harmful. With the UV index, you will know how much exposure is too much and what type of sun block you will need. The index predicts UV intensity levels on a scale of 1 - 11 and above, from a low risk of overexposure to an extreme risk respectively.

④ Radio-controlled timing for reliability and accuracy

The Oregon Scientific logo indicates that the product features radio-controlled timing, and will synchronise its calendar and clock automatically. With it, your time will always be reassuringly accurate.

Time & Weather Product Specifications

Anywhere Weather Kit

LW301 I refer to page 42

- Real-time and historical weather data viewable via smartphone or computer
- Comprehensive weather data, including temperature, humidity, barometric pressure, rainfall, wind speed / direction and UV index (optional UV sensor required)
- Includes main unit, 1 Internet-connected USB communication hub, 1 thermo-hygro sensor (with support for up to 8), 1 rain gauge and 1 wind sensor; compatible with protocol 3.0 sensors
- Online data storage
- Access to data recorded and shared by other users
- Easy set-up that requires no router settings
- Customisable alerts for your smartphone
- Internet connection and router are required

Available on the App Store   ANDROID APP ON Google play

Anywhere Weather Kit Basic

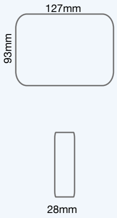
LW302 I refer to page 42

- Real-time and historical weather data viewable via smartphone or computer
- Comprehensive weather data, including temperature, humidity, barometric pressure, rainfall, wind speed / direction and UV index (optional rain, wind and UV sensor required)
- Includes main unit, 1 Internet-connected USB communication hub and 1 thermo-hygro sensor (with support for up to 8); compatible with protocol 3.0 sensors
- Online data storage
- Access to data recorded and shared by other users
- Easy set-up that requires no router settings
- Customisable alerts for your smartphone
- Internet connection and router are required

Available on the App Store   ANDROID APP ON Google play

THGR800

WH200



Ultra-precision Professional Weather System

WMR300 I refer to page 44

- Professional quality weather station & outdoor sensor system with optional NIST traceability calibration for US residents
- Large backlit LCD touch screen
- Graphical display of up to 24 months of detailed weather data at a time
- Comprehensive weather information, including forecast, indoor/outdoor temperature, humidity, barometric pressure, wind speed/direction, rainfall and heat index and dew point
- Tangential data including sunrise/sunset time and moon phase
- Includes main unit, 1 thermo-hygro sensor, 1 rain gauge and 1 wind sensor
- Radio-controlled clock
- 300m sensor transmission range
- Customisable recording interval allows user to specify how frequently data is gathered
- Data logger stores gathered data from three weeks to three years depending on the selected recoding interval
- USB connection for PC upload

Mounting methods

- Comprehensive weather data, including indoor / outdoor temperature, humidity, barometric pressure, daily / cumulative rainfall, wind speed / direction, dew point, heat index, wind chill and UV index (optional UV sensor required)
- Iconic display, including bar graphs (24-hour history of barometric pressure, accumulated rainfall and UV data), animated weather forecast (sunny, partly cloudy, cloudy, rainy and snowy) and moon phases
- Weather alert signals customisable for high / low temperatures, heat index, humidity, dew point, wind gusts, excessive rain and UV index
- Includes main unit, 1 thermo-hygro sensor (with support for up to 10), 1 rain gauge, 1 wind sensor and 1 solar panel; compatible with protocol 3.0 sensors
- Easy-to-use touch screen
- Built-in data logger with variable data storage of up to 1 year
- Current and 24-hour historical readings stored in memory with timestamp
- Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time
- Calendar function
- Long-range transmission between main unit and sensors of up to 100m
- Includes backlight for easy reading in low-light conditions
- Includes full mounting kit

Wireless PC-Connected Professional Weather Station

WMR180 I refer to page 46

- Comprehensive weather data, including indoor / outdoor temperature, humidity, barometric pressure, rainfall, wind speed / direction and UV index (optional UV sensor required)
- Iconic display including bar graphs (barometric, rainfall and UV data), weather forecast (sunny, partly cloudy, cloudy, rainy and snowy) and moon phases
- User-selectable settings: °C or °F (temperature) / mb/hPa, inHg or mmHg (barometric pressure)
- Wireless USB communications Hub for data download to PC
- Includes main unit, 1 PC communication hub, 1 thermo-hygro sensor, 1 rain gauge, 1 wind sensor and 1 solar panel
- Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time
- Calendar display in English, French, Italian, Spanish, German or Russian
- Rain and wind sensors powered by solar panel (included)

Pro Weather Station

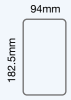
WMR86 | refer to page 46

- » Comprehensive weather data, including indoor / outdoor temperature, humidity, barometric pressure, rainfall, wind speed / direction and wind chill
- » Iconic display including bar graphs (barometric and rainfall data), weather forecast (sunny, partly cloudy, cloudy, rainy and snowy) and moon phases
- » User-selectable settings: °C or °F (temperature) / mb/hPa or mmhg (barometric pressure) / altitude
- » RF communication Protocol 3.0
- » Includes main unit, 1 thermo-hygro sensor, 1 rain gauge and 1 wind sensor
- » Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time
- » Calendar display in English, French, Italian, Spanish, German or Russian
- » Includes backlight for easy reading in low-light conditions
- » Powered by 3 x 2A batteries (included)

WGR800

PCR800

THGN800



Wireless Pro Weather Station with USB Upload

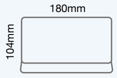
WMR88 | refer to page 47

- » Comprehensive weather data, including indoor / outdoor temperature, humidity, barometric pressure, daily / hourly rainfall, wind speed / direction, dew point, wind chill and UV index (optional UV sensor required)
- » Animated iconic display, including bar graphs (24-hour history of barometric pressure, hourly rainfall and UV data), weather forecast (sunny, partly cloudy, cloudy, rainy and snowy) and moon phases
- » Easy-to-read LCD screen
- » Includes main unit, 1 thermo-hygro sensor (with support for up to 3), 1 rain gauge and 1 wind sensor; compatible with protocol 3.0 sensors
- » Current and 24-hour historical readings stored in memory with a timestamp
- » Weather data is downloadable to a PC
- » Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time (DCF-77 for Continental Europe or MSF60 for UK; WWB-60 for the US)
- » Calendar function
- » Long-range transmission between main unit and sensors of up to 100m
- » Includes backlight function for easy reading in low-light conditions

WGR800

PCR800

THGN800



Advanced Weather Station with Wireless Sensor Set and Mounting Option

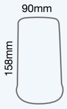
WMR100N | refer to page 47

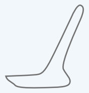
- » Comprehensive weather data, including temperature, humidity, barometric pressure, daily / cumulative rainfall, wind speed / direction, dew point, heat index, wind chill and UV index (optional UV sensor required)
- » Animated iconic display, including bar graphs (24-hour history of barometric pressure, accumulated rainfall and UV data), weather forecast (sunny, partly cloudy, cloudy, rainy and snowy) and moon phases
- » Weather alerts customisable for high / low temperatures, heat index, humidity, dew point, wind gusts, excessive rain and UV index
- » Includes main unit, 1 thermo-hygro sensor (with support for up to 10), 1 rain gauge and 1 wind sensor
- » Current and 24-hour historical readings stored in memory with timestamp
- » Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time
- » Calendar function
- » Long-range transmission between main unit and remote sensors of up to 100m
- » Includes backlight for easy reading in low-light conditions
- » PC-compatible software to store and view weather data via USB connection
- » Includes full mounting kit

WGR800

PCR800

THGN801





Wireless Rain Gauge with Indoor/Outdoor Thermometer

RGR126 | refer to page 47

- » Measures daily and cumulative rainfall
- » Self-empties automatically
- » Memory holds 9-day rainfall history
- » Displays indoor and outdoor temperature
- » Alarm signals high daily rainfall
- » Includes 1 rain gauge and 1 temperature sensor
- » Long-range transmission between rain gauge sensor and main unit of up to 100m

PCR122

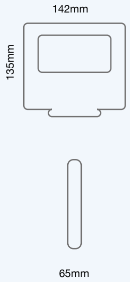
THN122N

7 Days Barometric History Weather Station

BAR801 | refer to page 48

- Built-in memory holds hourly barometric history for 7 days
- Iconic display of weather forecast (sunny, partly cloudy, cloudy and rainy) and previous 24-hour / 7-day barometric data
- Displays time, indoor / outdoor temperatures, weather forecast and barometric pressure
- Includes 1 temperature sensor
- Radio-controlled clock with calendar function
- User-selectable settings: mb/hPa, inHg or mmHg (barometric pressure)
- Altitude adjustment for atmospheric pressure compensation
- Low battery indication for main unit and remote sensor

RTHN318

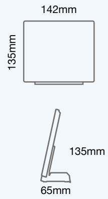


Slim Multi-days Weather Station

WMH800 | refer to page 48

- Displays time, indoor / outdoor and day / night temperatures, indoor humidity, current and upcoming 3-day weather forecast, precipitation percentage, wind speed / direction for user-selected city
- Continuously updates with weather data from selected city
- Includes 1 temperature sensor
- Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time
- 2-minute crescendo alarm with 8-minute snooze
- Receives weather warnings and advisory messages
- User-adjustable display contrast for easy reading
- Includes backlight for easy reading in low-light conditions
- Powered by 2 x CR2032 button cell batteries for main unit; 1 x 2A battery for sensor and 3 x 3A battery for stand

THN132N

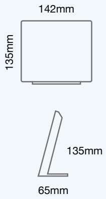


Ultra-thin Weather Station

BAR800 | refer to page 48

- Displays time, indoor / outdoor temperatures, weather forecast and humidity
- Includes 1 thermo-hygro sensor
- Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time (DCF-77 for Continental Europe or MSF60 for UK; WWB-60 for the US)
- Iconic display of weather forecast (sunny, partly cloudy, cloudy and rainy)
- Powered by 2 x CR2032 button cell batteries for main unit; 1 x 2A battery for sensor

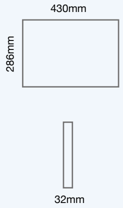
RTGN318



Jumbo Clock

JW102 | refer to page 49

- Large easy-to-read screen: 339 x 209mm/ 13” x 8”
- Displays time, day of the week, indoor / outdoor temperatures, weather forecast and moon phase
- Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time (DCF-77 for Continental Europe or MSF60 for UK; WWB-60 for the US)
- 30-minute advance alarm signals when outdoor temperatures fall below -3C°
- Memory holds daily high and low temperatures
- Day of the week display in English, French, German, Spanish or Italian
- Includes 1 temperature sensor (with support for up to 3)
- Can be wall-mounted or positioned on a desktop stand
- Powered by 4 x 2A batteries for main unit; 2 x 2A batteries for sensor

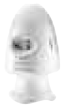


Weather Station with 5-line LCD Display

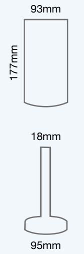
BAR908HG I refer to page 49

- » Displays time, indoor / outdoor temperature, humidity, barometric pressure, heat index, comfort level and UV index (optional UV sensor required)
- » Iconic display of animated weather forecast (sunny, partly cloudy, cloudy, rainy and snowy)
- » Includes 1 thermo-hygro sensor (with support for up to 5)
- » Features record of daily high and low indoor / outdoor temperatures and humidity
- » 24-hour historical bar chart for barometric pressure and UV data (optional sensor required)
- » Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time
- » 2-minute crescendo alarm with pre-alarm function
- » Calendar function

RTGN318



UVR138 (Optional)

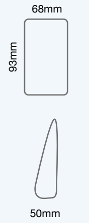


InstaForecast 4-day Weather Forecaster

WMH90 I refer to page 49

- » Displays time, indoor / outdoor and day / night temperatures, indoor humidity, current and upcoming 3-day weather forecast, rainfall, wind speed / direction, and precipitate percentage
- » Continuously updates with weather data from selected city
- » Easy-to-use, no installation
- » Includes 1 temperature sensor
- » Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time (DCF-77/ HBG-75)
- » 2-minute crescendo alarm with 8-minute snooze
- » Includes backlight for easy reading in low-light conditions
- » Receives weather warnings and advisory messages
- » Long-range transmission between main unit and wireless sensor of up to 100m
- » User-adjustable display contrast for easy reading
- » Includes backlight for easy reading in low-light conditions

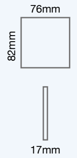
THN132N



Digital Window Thermometer

THT328 I refer to page 49

- » Displays current, high and low temperatures
- » Ice alert signals when outdoor temperature nears icy conditions
- » Waterproof
- » Adhesive stickers included for mounting

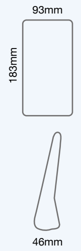


Weather Station (Premier Model)

BAR208HG I refer to page 50

- » Displays indoor / outdoor temperatures and trends, indoor / outdoor humidity and trends, time and moon phases
- » Includes 1 thermo-hygro sensor (with support for up to 3)
- » Displays weather warnings and alerts
- » Provides informative and detailed 12-hour weather forecasts
- » Records daily high/low temperatures (indoor and outdoor) and indoor humidity
- » Ice alert signals when outdoor temperatures near icy condition
- » Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time (DCF-77 for Continental Europe or MSF60 for UK)
- » Includes backlight for easy reading in low-light conditions
- » Wireless transmission range of up to 30m

THGN132N

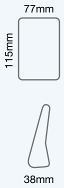


Weather Station (Standard Model)

BAR206 I refer to page 50

- Displays indoor / outdoor temperature and indoor humidity
- Provides informative and detailed 12-hour weather forecasts
- Includes 1 temperature sensor (with support for up to 3)
- Records daily high/low temperatures (indoor and outdoor) and indoor humidity
- Ice alert signals when outdoor temperatures near icy condition
- Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time (DCF-77 for Continental Europe or MSF60 for UK)
- Calendar function
- Includes backlight for easy reading in low-light conditions
- Wireless transmission range of up to 30m

THN132N

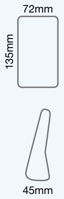


Indoor / Outdoor Thermometer with Radio-controlled Clock

RMR202 I refer to page 50

- Displays time, indoor / outdoor temperature
- Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time (DCF-77 for Continental Europe or MSF60 for UK)
- Includes 1 temperature sensor (with support for up to 3)
- Records daily high/low temperatures (indoor and outdoor)
- Ice alert signals when outdoor temperatures near icy condition
- Calendar and time-zone functions
- Wireless transmission range of up to 30m

THN132N

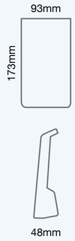


Solar Weather Station with Indoor / Outdoor Humidity

BAR808HG I refer to page 51

- Displays indoor / outdoor temperatures, humidity, moon phases and trends
- Includes 1 thermo-hygro sensor (with support for up to 3)
- Provides informative and detailed 12-hour weather forecasts
- Records daily high/low temperatures (indoor and outdoor) and humidity
- Displays weather warnings and alerts
- Ice alert signals when outdoor temperatures near icy condition
- Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time
- Includes backlight for easy reading in low-light conditions
- Wireless transmission range of up to 30m
- Uses environmentally friendly solar energy for longer battery life

THGN132N

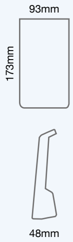


Solar Weather Station with Indoor Humidity

BAR806 I refer to page 51

- Displays indoor / outdoor temperatures, indoor humidity and time
- Includes 1 temperature sensor (with support for up to 3)
- Provides informative and detailed 12-hour weather forecasts
- Records daily high/low temperatures (indoor and outdoor) and indoor humidity
- Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time (DCF-77 for Continental Europe or MSF60 for UK)
- Ice alert signals when outdoor temperatures near icy condition
- Includes backlight for easy reading in low-light conditions
- Wireless transmission range of up to 30m
- Uses environmentally friendly solar energy for longer battery life

THN132N



Mutli-zone Weather Station

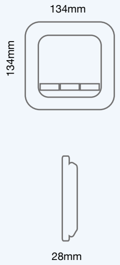
RAR501 | refer to page 52

- Multi-zone weather monitoring
- Easy-to-read LCD screen with button-free design
- Main unit displays data from up to 4 locations, identified by customisable tabs
- Includes main unit, 1 thermo-hygro sensor and 2 thermo-hygro sensors with LCD display
- Iconic display of weather forecast (sunny, partly cloudy, cloudy, rainy and snowy) up to a day in advance
- Updates automatically
- Wireless transmission up to 30m
- Mold alert

THGN132N

THGN122N

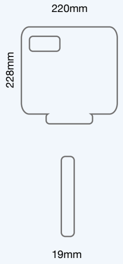
THGN122N



Weather Whiteboard

MB108 | refer to page 53

- Displays indoor / outdoor temperatures and 24-hour forecast
- Iconic display of weather forecast (sunny, cloudy and rainy)
- 8 x 8” UV-coated high-gloss whiteboard for messages and lists
- Includes 1 temperature sensor
- Low battery indicator for both the main unit and outdoor remote sensor
- Wireless transmission up to 30m
- Includes a wall mount bracket
- Includes a dry erase pen marker and adhesive pad

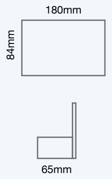


Crystal Weather Moments

CW101 | refer to page 55

- Displays time, indoor / outdoor temperature, weather forecast and lighting effects
- Iconic display of weather forecast using 3 crystals (sunny, cloudy and rainy)
- Variable light display changes with12 hours+ weather forecast
- Toggle between display modes with auto-toggle or a hand-wave (motion sensor)
- Dual band radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time
- Includes 1 temperature sensor (with support for up to 3)

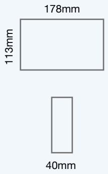
EW99



Crystal Weather Station

BA900 I refer to page 56

- Displays time, indoor temperature and weather forecast
- Iconic display of weather forecast using innovative laser-engraved 3D crystals illuminated by colourful lighting
- Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time (DCF-77 for Continental Europe or MSF60 for UK)
- Toggle between display modes with a hand-wave (motion sensor)
- Powered by DC6V adaptor (included)

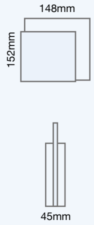


Rainbow Clock with 8 soothing sounds

RRM902 I refer to page 57

- Peaceful morning wake-up with 8 soothing natural sounds
- Colour-changing light display for ambient effect
- Includes 1 temperature sensor
- Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time (DCF-77 for Continental Europe or MSF60 for UK; WWB-60 for the US)
- Preset daily alarm with 8-minute snooze, sleep timer, and 3 wake-up settings (2-minute crescendo, soothing sound or radio)
- Displays outdoor temperature
- FM radio with 8 presets
- Audio line-in jack
- Touch panel technology
- LCD display with dimmer function
- Powered by 4.5V adapter and 1 x CR2032 button cell for backup (included) for main unit; 1 x 2A battery for sensor

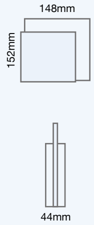
THN132N



Rainbow Clock with 4 soothing sounds

RM901 I refer to page 57

- Peaceful morning wake-up with 4 soothing natural sounds
- Colour-changing light display for ambient effect
- Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time (DCF-77 for Continental Europe or MSF60 for UK; WWB-60 for the US)
- Preset daily alarm with 8-minute snooze, sleep timer, and 2 wake-up settings (2-minute crescendo and soothing sound)
- Audio line-in jack
- Touch panel technology
- LCD display with dimmer function
- Powered by 4.5V adaptor and 1 x CR2032 button cell for backup (included)

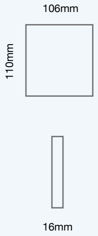


Easy Fix Thermometer Pad

EW102 I refer to page 58

- Displays indoor / outdoor temperature and humidity
- Includes 1 thermo-hygro sensor (with support for up to 3)
- Records daily high/low indoors and outdoors temperature and humidity
- Ice alert signals when outdoor temperatures near icy condition
- Large 10.2cm display for easy reading
- Includes easy-fix magnetic, destop and wall-mounts
- Powered by 2 x UM4 (AAA) 1.5V batteries (included)

EW109

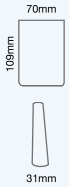


Indoor/Outdoor Thermometer with Ice Alert

EW91 I refer to page 58

- Displays indoor / outdoor temperatures
- Records high/low temperatures
- Includes 1 temperature sensor
- Ice alert signals when outdoor temperatures near icy condition

EW99

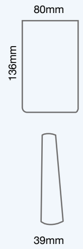


Indoor/Outdoor Thermometer with Alarm Clock and Ice Alert

EW92 I refer to page 58

- Displays indoor / outdoor temperatures, time and calendar
- Record daily high/low temperatures
- Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time
- Alarm with 8-minute snooze
- Calendar function
- Includes 1 temperature sensor
- Ice alert signals when outdoor temperatures near icy condition

EW99

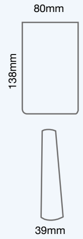


Weather Station with Radio-controlled Clock and Ice Alert

EW93 I refer to page 58

- Displays indoor / outdoor temperatures, weather forecast, time and calendar
- Record daily high/low temperatures
- Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time
- Alarm with 8-minute snooze
- Calendar with date display
- Includes 1 temperature sensor
- Ice alert signals when outdoor temperatures near icy condition

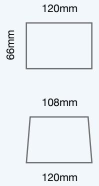
EW99



All-in-one Bedside Clock

EW103 I refer to page 59

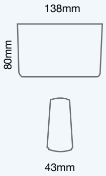
- Projects time and alarm icon on wall or ceiling with 180° adjustable projection arm and manual focus adjustment
- Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time (DCF-77 for Continental Europe or MSF60 for UK)
- Two crescendo alarms with 8-minute snooze, 120-minute sleep timer (with radio or nature sounds) and 2 wake-up settings (2-minute crescendo and soothing sound)
- Indoor temperature display
- FM radio with PLL tuning and volume control
- Plays 3 soothing nature sounds
- Line-in jack for external audio devices
- Includes backlight for easy reading in low-light conditions
- Low battery indicator
- Powered by 4.5V AC/DC adaptor (included) or 2x UM-3 (AA) 1.5V batteries (included) for clock display only



Projection Alarm Clock with Indoor Thermometer

EW96 I refer to page 59

- Projects time on wall or ceiling
- Indoor temperature display
- Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time
- Alarm with 8-minute snooze
- Calendar with date display

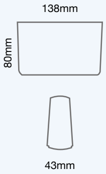


Projection Alarm Clock with Indoor/Outdoor Thermometer and Ice Alert

EW98 I refer to page 59

- Projects time and outdoor temperature on wall or ceiling
- Indoor/outdoor temperature display
- Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time
- Alarm with 8-minute snooze
- Calendar with date display
- Includes 1 temperature sensor
- Records daily high/low temperatures
- Ice alert signals when outdoor temperatures near icy condition

EW99

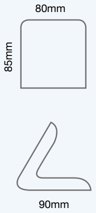


SNAP Thermometer

SL101 I refer to page 60

- Touch screen to toggle between displays
- Displays indoor / outdoor temperatures, time and calendar
- Includes 1 temperature sensor (with support for up to 3)
- Customisable display – hide parts not in use
- Includes backlight for easy reading in low-light conditions
- Records daily high/low temperatures
- Daily crescendo alarm with 8-minute snooze
- Ice alert signals when outdoor temperatures near icy condition
- Low battery indicator
- Powered by 2 x UM-4 (AAA) 1.5V batteries (included)

SL109

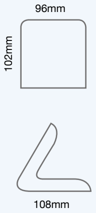


SNAP Temperature Plus

SL102 I refer to page 60

- Touch screen to toggle between displays
- Displays indoor / outdoor temperatures, humidity, time and calendar
- Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time (DCF-77 for Continental Europe or MSF60 for UK; WWB-60 for the US)
- Includes 1 thermo-hygro sensor (with support for up to 3)
- Customisable display – hide parts not in use
- Includes backlight for easy reading in low-light conditions
- Records daily high/low temperatures
- Daily crescendo alarm with 8-minute snooze
- Ice alert signals when outdoor temperatures near icy condition
- Low battery indicator
- Powered by 2 x UM-3 (AA) 1.5V batteries (included)

SL109H

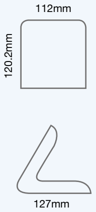


SNAP Weather Forecaster

SL103 I refer to page 60

- Touch screen to toggle between displays
- Displays 12-hour weather forecast, 24-hour historical bar graph, indoor / outdoor temperatures, humidity, time and calendar
- Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time (DCF-77 for Continental Europe or MSF60 for UK; WWB-60 for the US)
- Includes 1 thermo-hygro sensor (with support for up to 3)
- Customisable display – hide parts not in use
- Includes backlight for easy reading in low-light conditions
- Records daily high/low temperatures
- Daily crescendo alarm with 8-minute snooze
- Ice alert signals when outdoor temperatures near icy condition
- Low battery indicator
- Powered by 2 x UM-3 (AA) 1.5V batteries (included)

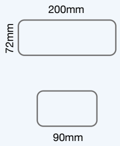
SL109H



EasyPlus Talk o'Clock

EC101 I refer to page 61

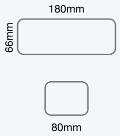
- Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time
- Calendar display
- Audio reporting of time, date, and day of the week with five language options
- Large 3cm LCD display
- Loud 95db alarm
- Digital FM radio
- Daily crescendo alarm with 8-minute snooze
- 2 alarm settings: Beep or radio
- Time projection with manual focus adjustment
- 2 display brightness levels
- Includes backlight for easy reading in low-light conditions
- Powered by DC 6V adaptor for continuous operation, and 2 x UM-4/AAA batteries (not included) for backup



Radio-controlled Projection Clock

RRA320PN I refer to page 61

- Projects time and alarm
- Displays time in 12 or 24 hour format
- 2 alarm settings: 2-minute crescendo and radio
- Sleep timer function
- Large LCD display with dimmer function
- FM radio
- Powered by 6V AC adaptor and 2 x 3A batteries for backup

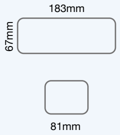


Radio-controlled Projection Clock with Outdoor Temperature

RRM320P I refer to page 61

- Projects time, alarm and outdoor temperature
- Includes 1 temperature sensor
- Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time (DCF-77 for Continental Europe or MSF60 for UK; WWB-60 for the US)
- 2 alarm settings: 2-minute crescendo and radio
- Large LCD display with dimmer function
- FM radio with 8 presets
- Powered by 6V AC adaptor and 2 x 3A batteries for backup ; 1 x 2A batteries for sensor

RTHN138

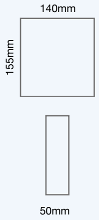


Weather Day & Night

BAR339DP I refer to page 62

- Dual line daylight projection of time, temperature and weather forecast icons on wall or ceiling with 180° adjustable projection arm
- Includes 1 temperature sensor
- Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time
- 2-minute crescendo alarm with 8-minute snooze
- Displays high and low indoor / outdoor temperatures
- Light sensor adjusts projection and LCD light intensity between day and night
- Includes backlight for easy reading in low-light conditions
- Powered by 5V AC adaptor and 2 x CR2032 button cell for backup ; 1 x 2A batteries for sensor

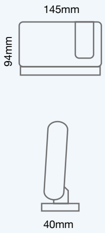
RTHN318



Classic Dual-alarm Projection Clock

RM308P I refer to page 62

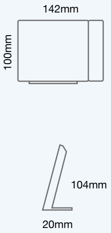
- Projects time and alarm on wall or ceiling with 180° adjustable projection arm
- Continuous projection (requires use of adaptor)
- Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time (DCF-77 for Continental Europe or MSF60 for UK; WWB-60 for the US)
- 2 alarm settings: 2-minute beep and 8-minute snooze function
- LCD display
- Includes backlight for easy reading in low-light conditions
- Powered by AC/DC 4.5V adaptor and 2 x 3A batteries for backup (included)



Slim Projection Clock

RM368P I refer to page 62

- Projects time and alarm on wall or ceiling with 180° adjustable projection arm
- Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time (DCF-77 for Continental Europe or MSF60 for UK; WWB-60 for the US)
- Tap on technology – just tap the clock to activate snooze
- 2-minute crescendo buzzer alarm with 8-minute snooze function
- Continuous projection (requires use of adaptor)
- Large digit display for easy viewing
- Powered by 3V adaptor or 2 x CR2032 button cell batteries for main unit; 1 x 2A 1.5V battery for sensor

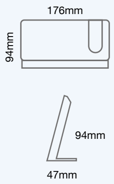


Slim Projection Clock

RMR391P I refer to page 62

- » Projects time and alarm on wall or ceiling with 180° adjustable projection arm
- » Includes temperature sensor
- » Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time
- » 2-minute crescendo buzzer alarm with 8-minute snooze function
- » Powered by 3V adaptor or 2 x CR2032 button cell batteries for main unit; 1 x 2A 1.5V battery for sensor

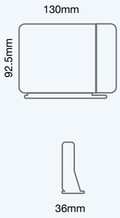
THN132N



Radio-controlled Projection Clock with Indoor Thermometer

TW223 I refer to page 63

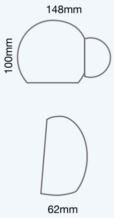
- » Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time
- » Projects time and indoor temperature on wall or ceiling with 180o adjustable projection arm
- » Features indoor thermometer
- » Includes alarm with snooze function
- » LCD display
- » Includes amber backlight for easy reading in low-light conditions
- » Calendar displays weekdays in English, French, German, Spanish and Italian
- » Powered by adaptor and batteries for backup (included)



ColorBerry Projection Clock

RM303P I refer to page 63

- » Radio-controlled (atomic) clock for precise time-keeping that never needs adjusting for Daylight Savings Time
- » Projects time and alarm icon on wall or ceiling with 180° adjustable projection arm
- » Continuous projection (requires use of adaptor)
- » LCD display
- » Includes backlight for easy reading in low-light conditions
- » Powered by AC/DC 4.5V adaptor and 2 x 3A batteries for backup (included)



Projection Clock Glow in Dark

TW221 I refer to page 63

- » Soothing sound alarm with snooze
- » Projects the time and alarm status with a touch of a button
- » 180 degree angle adjustable projection on the wall or ceiling
- » Continuous projection when connected to the mains adaptor
- » Radio-controlled clock and calendar
- » LCD backlight for easy viewing in lowlight condition
- » Powered by 2xAA batteries or DC adaptor (included)

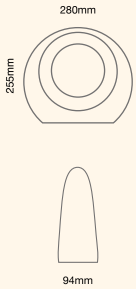
Wellness & Beauty Product Specifications

illumi Ambient Wakeup Light

WL201 I refer to page 88

- Synchronises alarm via iOS/Android app on Smartphone to find the best time to wake up according to the sleep cycle
- The illumi app displays sleep pattern, total and average sleep time, statistics, alarm settings and more
- Dual lighting system uses energy efficient and long-lasting LED technology for dawn-dusk simulation and colourful mood lighting in thousands of hues
- Touch technology – simply touch the halo to change the colour options
- Ambient modes present a relaxing display combining shifting light and natural sounds
- Plays 6 soothing natural sounds and FM radio
- Digital clock with alarm using natural sounds or FM wake-up
- Elegant design fits any home decor
- Includes line-in for playing music via other audio devices
- Powered by 10V AC/DC adaptor

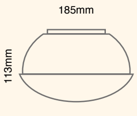
Made for iPhone



Earth Aroma Diffuser

WA205 I refer to page 90

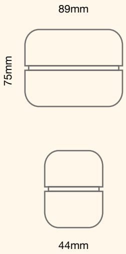
- Diffuses soothing aromatic mist for a relaxing ambience
- Uses natural wood with refined glass and ceramic to create a sophisticated natural design
- Large tank for up to 4 hours of vapour
- Uses safe, flameless and whisper-quiet ultrasonic diffusion technology
- 4 ambient lighting modes: pink, blue, purple and changing-colors
- Plays 5 natural sounds and music
- Optional timer settings for continues 1, 2 or 4 hours of mist
- Volume control for high- or low-density mist
- Powered by 24V AC/DC adaptor



Travel Aroma Cube

WS113 I refer to page 92

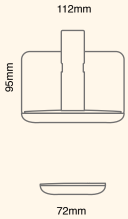
- Diffuses soothing aromatic mist for a relaxing ambience
- Sleek modern design with simple touch-key on/off switch and blue LED light
- Uses safe, flameless and whisper-quiet ultrasonic diffusion technology
- Sleep timer with 1 or 2 hour settings
- Automatically shuts off when water level drops too low
- Includes a travel pouch
- Powered by USB for desktop or travel usage (cable included)
- Power consumption: 5W



Scentsation Aroma Diffuser

WS116 I refer to page 93

- Diffuses soothing aromatic mist for a relaxing ambience
- Compact modern design includes palm-sized battery docking for alternative power supply
- USB-powered for desktop PC or travel usage
- Uses heater diffusion technology
- Uses with natural essential oils for their therapeutic benefits
- Automatically shuts off after 2 hours
- Built-in flash memory in USB v.2.0 (optional)
- Compatible with Windows ME/2000/XP/Vista/7, Mac OS & Linux
- Powered by USB or battery docking with 3 x AAA batteries (not included)
- Power consumption: 2.5W

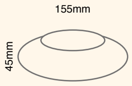


Halo Aroma Diffuser

WS115 I refer to page 93

- Diffuses soothing aromatic mist for a relaxing ambience
- Sleek modern design with mood light and detachable aroma plate for easy cleaning
- USB-powered for desktop or travel usage
- Uses safe, flameless fan diffuser technology
- Digital clock with backlight for easy reading in low-light conditions
- Powered by USB or 4 x AAA batteries (not included)
- Power consumption: 2.5W

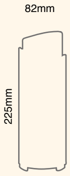
*Suggest to use with natural essential oils for their therapeutic benefits



ZEN Aroma Diffuser

WS909 I refer to page 94

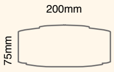
- Diffuses soothing aromatic mist for a relaxing ambience
- Natural design featuring wood housing and multi-sensory relaxation modes (aroma, light effects, soothing sounds/music)
- Uses safe, flameless and whisper-quiet ultrasonic diffusion technology
- 6 shifting mood lighting modes: pink, purple, orange, yellow, green and blue
- Plays 5 natural sounds and music
- Sleep timer with 1 or 2 hour settings
- Automatically shuts off when water level drops too low
- Includes line-in for use with other audio devices
- Includes infrared remote control
- Powered by 24V AC/DC adaptor
- Power consumption: 24W



i.relax Aroma Diffuser

WS903 I refer to page 94

- Diffuses soothing aromatic mist for a relaxing ambience
- Modern design with multi-sensory relaxation modes (aroma, light effects, soothing sounds/music)
- Uses safe, flameless and whisper-quiet ultrasonic diffusion technology
- 6 shifting mood lighting modes: pink, purple, orange, yellow, green and blue
- Plays 5 natural sounds and music: raindrops, ocean waves, birdsong, piano and yoga music
- Digital clock with alarm using sound, aroma or light
- Wake-up and sleep mode for aroma diffusion
- Automatically shuts off when water level drops too low
- Includes infrared remote control
- Powered by 24V AC/DC adaptor
- Power consumption: 24W

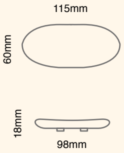


Floating Aroma Lantern

WS112 I refer to page 95

- Diffuses soothing aromatic mist for a relaxing ambience
- Floating waterproof design for use in the bathroom or spa.
- Water inlet for water fill-in to use under water
- Uses safe, flameless vaporising aroma diffusion technology
- Mood lighting mimics the relaxing flicker of candlelight
- Rechargeable (includes charging dock)
- Includes 3 changeable lantern films with different patterns
- Power consumption: 1W

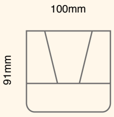
*Suggest to use with natural essential oils for their therapeutic benefits



Compact Aroma Humidifier

WS128 I refer to page 95

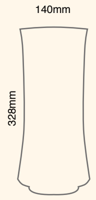
- Ultrasonic mist diffusion system with 2 adjustable diffusion levels
- Silver ion anti-microbial water chamber inhibits germs and keeps water fresh
- Reuses standard beverage bottles as a water tank to reduce carbon footprint
- Able to use independently as on-the-spot humidifying
- Supplied with 2 bottle adaptors
- Rotatable tank cover to adjust mist direction
- Easy one-touch system for power and diffusion control
- Equipped with aroma diffusion plate for instant aromatherapy
- Ambient lighting effects
- Available in black cherry and white coconut
- Carrying pouch included
- Powered by AC adaptor



i.fresh NCCO Air Sanitizing System

WS907 I refer to page 96

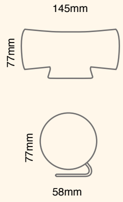
- Uses 4-stage Nano-Confined Catalytic Oxidation (NCCO) air sterilising technology
- Filtration system uses a replaceable Zeorite nano-filter (lasts 3 years) and washable pre-filter
- Removes 99.95% of viruses (H3N2)*1, 99.99% of bacteria (Staphylococcus albus)*2, 99.52% of odours caused by TVOCs, formaldehyde, benzene, and acetone*3, and over 99.72% of respirable suspended particulates (RSP)*4
- Digital air quality indicator ranks air quality from 1 (improved) to 20 (poor)* Relative air quality index from 1(improved) to 5 (poor) for model WS907N
- Easy-to-read LED status indicator: amber (air needs improved), green (in progress), blue (improved)
- Includes a volatile organic compound (VOC) air quality sensor
- 4-speed fan: auto, high, low and silent
- Recommended room size: ~ 150 ft^2
- Smart night mode automatically adjusts LED brightness
- Safety lock holds filters securely
- Powered by 12V AC/DC adaptor
- Power consumption: 18W



i.fresh Compact NCCO Air Sanitizing System

WS908 I refer to page 97

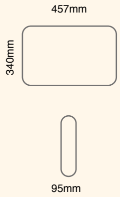
- Applies 4-stage Nano-Confined Catalytic Oxidation (NCCO) air sterilising technology
- Filtration system uses a replaceable Zeorite nano-filter (lasts 3 years) and washable pre-filter with Ionizer
- Removes 98.5% of viruses (H3N2)*1, 96.54% of bacteria (Staphylococcus albus)*5, 85.83% of odours caused by TVOCs and smoke*3, 91.67% of respirable suspended particulates (RSP)*4
- 1-speed fan
- Recommended room size: ~ 105 ft^3
- One-touch on/off operation
- Powered by USB, car charger or 5V AC/DC adaptor
- Power consumption: 2.5W



Massage Cushion with Heat

IBM80010 I refer to page 98

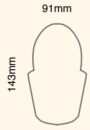
- Ergonomic design with synthetic leather suitcase
- Versatile massage for upper/lower back, shoulders, thighs, calves and feet
- Symmetrical 4-point circular kneading in 2 motions: clockwise or anti-clockwise
- Optional soothing heat therapy
- 3 levels of intensity: soft, moderate, strong
- Safety timer shuts massager off automatically after 15 minutes
- Lightweight with hand strap for easy carrying
- Powered by 12V AC/DC adaptor



Mini Massager with Clock

WS901 I refer to page 99

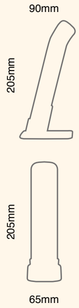
- Stylish and colourful with handy compact design
- Vibration massage mode
- Simply press-to-knead for immediate massage
- Two interchangeable massage modules: therapeutic rollers and pinpoint nodes
- Soft rubber handle grip for easy holding
- LCD clock on base unit
- Powered by 3 x AAA batteries
- Power consumption: 1W



Cordless Handheld Massager with Heat

WS906 I refer to page 99

- Stylish and colourful with handy compact and cordless design
- Optional pinpoint heat feature
- 2 levels of massage intensity
- Includes a crystal stand
- Rechargeable, with up to 4 hours of use when fully charged
- Powered by USB or 5V AC/DC adaptor
- Power consumption: 2.5W



---

*1 Tested by Biomedical Science Association (BMSA) in Japan. Test method: H3N2 was emitted in the air in 120L box and the percentage of H3N2 removal was measured.

*2 Tested by Guangzhou Detection Centre of Microbiology. Test method: Bacteria was suspended in the air in 1m^{3}cube and percentage of airborne bacteria sterilized was measured.

*3 Tested by SGS. Test method TVOC was emitted in the air in 70x70x70cm box and the percentage of TVOC removal was measured.

*4 Tested by SGS. Test method: RSP was emitted in the air in 70x70x70cm cube and the percentage of RSP removal was measured.

*5 Tested by SGS. Test method: Airborne bacteria were emitted in the air in 70x70x70cm cube and the percentage of total bacteria removal was measured.
